INTAREMIT S.A.	QUALITY AND ENVIRONMENT DEPARTMENT	Pág: 1 de 1

The management of INTAREMIT is committed to the operation of the Integrated Quality and Environmental Management System, for this reason it has been certified by an external entity under the ISO 9001 and ISO 14001 standards.

In this regard, INTAREMIT is committed to a customer-centric approach: assessing customer needs and expectations and providing the necessary means to meet and exceed them. Maintaining customer trust is achieved by guaranteeing a quality product, which is accomplished through achieving objectives and effective communication with stakeholders; providing the necessary resources; and developing employees to support the Management System and ensure its continuous improvement.

To promote the systematic incorporation of the most advanced technologies available, in order to offer the best product quality at all times and also minimize the impact of activities on the environment.

Manage all activities with the commitment to comply with both legal requirements and any other requirements that INTAREMIT subscribes to, establishing a framework for continuous improvement of processes and their environmental impacts.

To implement sustainable management, optimizing the consumption of energy resources and raw materials, and adopting the necessary measures to prevent any type of pollution.

We believe that sustained success can only be achieved through people, which is why we promote a culture of zero defects, zero waste, and zero incidents. Consistent improvement goals and targets are set periodically and are continuously monitored.

We protect the environment by using natural resources efficiently, preventing pollution, and disposing of waste properly.
